ONIS 6816 :   Handset
                    Charger
                    2 AA/LR6 NiCd* batteries
                    Power block and cord
                    User manual

---

*   Country dependent
**   Quoted talk and standby times with 2 AA/LR6 600 mAh NiCd batteries
***   The quoted range is under ideal conditions, i.e. with no obstacles between the base and handset.
       The range of DECT cordless telephones depends on:
       - the environment in which the base station is located: thick walls, metallic window frames etc. near the base will reduce the phone's range
       - the presence of obstacles between the base station and handset: for example, when using a handset in the garden with the base station inside the house, the range may be reduced
         by the exterior wall of the house.

Availability in individual countries depends on approval by the relevant authorities. Data subject to alteration without notice.

Let's make things better.
